Understanding Your 2027 Medicare Part D Benefits and Payment Options

$2,400
ANNUAL CAP

In 2027, all Medicare Part D plans will have an annual cap that limits your total out-of-pocket prescription drug costs to a maximum of $2,400 for the year, for all covered medications.

Once your deductibles, copays, or coinsurance reach this $2,400 limit, you could pay $0 for your covered medications for the rest of the calendar year.

If you take **CREXONT® (carbidopa and levodopa) extended-release capsules, ONGENTYS® (opicapone) capsules,** or other medications covered by your Medicare Part D plan, your out-of-pocket prescription costs may vary throughout the year based on your individual plan, coverage, and other medications you take. For some people, prescription costs may be higher during certain months of the year.

The Medicare Prescription Payment Plan provides an optional way to manage these out-of-pocket costs over time. The program does not reduce or change the total amount you owe. Instead of paying your full out-of-pocket cost at the pharmacy when you fill a prescription, the program allows you to spread those costs across monthly payments throughout the remaining months of the calendar year.

Key Information for Patients Enrolled in the Medicare Part D Prescription Program

Here are two important changes you should know about the out-of-pocket prescription drug costs for patients enrolled in the Medicare Part D Prescription Payment Plan:

1 Medicare Part D patients out-of-pocket costs will be capped at $2,400 in 2027*

2027 prescription medication guidelines limit the maximum amount of out-of-pocket prescription drug costs for patients.

2026 maximum out-of-pocket prescription drug costs	2027 maximum out-of-pocket prescription drug costs
$2,100 for all covered Part D medications	**$2,400** for all covered Part D medications

2 The Medicare Prescription Payment Plan can make costs more predictable**

The payment plan option allows enrolled patients to pay prescription drug costs as fixed monthly payments to their Medicare Part D plan. Patients must be enrolled to participate in this program and patients may enroll at any point during the year.

Patients who enroll in the payment plan:

- Patients enrolled before January 1, 2027, could have maximum payments of approximately $200 per month (12 payments) for all of their covered pharmacy medications, for a yearly total of $2,400* made directly to their Medicare Part D plan.
- Enrolled patients have no additional pharmacy copays.

* Includes Medicare Part D (PDPs), Medicare Part C with prescription drug coverage (MA-PDs), and those enrolled in Medicare Savings Programs and the Medicare Part D Extra Help Program.
