

Excellent career opportunities: Hear how Keaton has advanced his career

I'm Keaton Druin. I'm Logistics Auditor and I've been with Amneal for 5 years.

After high school I actually envisioned being a teacher

and years later decided that wasn't the career path that I really wanted to pursue.

And then I found a job prior to Amneal in a logistics job and I took the job.

I realized that's the job I wanted to do and I pursued my degree in business management.

When I started at Amneal I was still in school.

Before I completed my degree I was promoted to Inventory Control position and that position helped me get through school more than school helped me do my daily tasks because I was already exposed to daily activities at a job environment.

And after completing my degree I was promoted to Logistics Auditor.

Everybody has had a hand in my growth from my logistics team, from my warehouse team, from our facilities team.

I work with these guys on a daily basis and they've all continued to help me to grow and if I make a mistake it's not a browbeater situation.

They kinda coach me through it and let me learn from my mistakes and continue to grow.
