

We're growing in Glasgow

Amneal's economic impact into the community has been outstanding.

As we continue to grow and invest into our organization, whether that's into new product lines or into actual physical brick-and-mortar facilities, we grew out at 30,000 square feet from 2007 to 115,000 square feet in 2010, and then in 2014 we populated another 109,000 square feet of facility, and then in 2018 we created our first brick-and-mortar facility.

Brought it in from scratch over on Carroll Knicely and it ended up being a 86,000 square-foot facility with real high bay storage.

In 2007 it was when we were 30,000 square feet we had 18 employees total across the board.

I can remember when the holidays come it was all hands-on deck and we grew in 2010 we extended that impact value their employees to almost 50 people after we went through 2010 to 2014 population Aberdeen Drive that also increased to around 80 something employees.

Carroll Knicely brought us in the future 2018 which was an investment not only in our organization from a distribution but also from an office perspective and brought us to a total of where we are today which is 150.

As we continue to bring new product lines on and continue to increase our footprint gets bigger will continue to increase the opportunities for employment with Amneal and one thing Amneal likes to do more than anything is promote within.

We sell our employees they are our number one asset that if we just we love to be able to see them grow with us as our volumes continue to improve and we continue to get their product line Amneal will continue to look towards investment in Glasgow because of the work structure and our ability and footprint that we have here today.

With our organization that influx of physical brick-and-mortar that we've implemented has allowed us the opportunity to hire new employees, to broaden out our job description base, be able to be more of a partnership with the community and be able to give back.

We invest not only in the employees, but we also invest in our community, we invest in the kids in our community; we like to give back donation wise. We're here to help and assist.

It's great to know that you have an organization that not only cares about its employees but cares about the community, that has a focal point, and giving back to that community makes everybody stronger anything and it increases our Economic Development because as we continue to go through the years we want see this community grow as much as Amneal has been able to grow.
