

Becoming.

It's the journey
From where we've been
To where we are
To who and what we want to be

A journey not of chance

But of determination and intention.
...shaped by commitments we live:

The priorities we embrace

And our shared will
not just to "get it done"

But to do what we know is right:

Right for our Amneal family

And right for the people we serve

The people who trust us.

The people who depend on us.

The people we put first:

The families we help

The patients we give hope to

Through new possibilities
for living fuller and healthier lives

It's for them that we're becoming...

A culture of listening.

Of innovation and continuous learning.

A culture of leaders.

With leadership not just a title.

But a quality we cultivate and cherish.

Where whatever our role

In all that we do

We know who we do it for.

And as we become stronger--

More resilient

More of who we are

We will touch more lives

Our Amneal family:

Making Healthy Possible

For all the families we serve
