Strategically-located Footprint

Providing access to affordable, high-quality medicines

Patient accessibility is at the heart of everything we do. From our global R&D teams to our state-of-the-art manufacturing and distribution facilities, we advance innovations that improve patients' access to the medicines they need.

We are strong advocates for improving healthcare – partnering with government, trade associations and several not-for-profit organizations focused on reducing healthcare barriers and disparities, especially in underserved communities.

Our culture is how we make healthy possible

We believe that together, we can do more to improve health. Our Rise, Lead, Succeed culture encourages all colleagues to be leaders – sharing ideas, expressing opinions and driving progress and change across the business.

We also place a premium on giving back and encourage our employees to actively support the vitality of our communities via company-sponsored Social Responsibility commitments, including advocacy, employee volunteerism, fundraising and product donations.
